- H. Mentor Bio:**

While there is a team at AFRL driven to create, record, promote, and propagate the proud history of contributions the Rocket Site has made to American's space-faring history, the mentor for this project will be Dr J Shelley. Dr Shelley has a PhD in Mechanical Engineering, has worked at the Rocket Site for 33 years, and taught upper division mechanical engineering and design for 20 years. She has experience creating educational curricula for middle school through university audiences and has conducted and supervised literature research in rocket propulsion.

I. Co-Mentor Bio:

Joseph Jones is a seasoned professional with over a decade of experience in cinematography and photography, complemented by an advanced knowledge of audio engineering. His diverse skill set has allowed him to excel in a variety of projects, from creating compelling documentaries to previously collecting critical photographic data for the Air Force at the 412th test wing. Joseph's expertise in recording and mixing audio further enhances his ability to tell powerful stories through both visual and auditory mediums. Joseph now serves as Lead videographer at RQ West as a part of the Creative services team.

J. Internship Project Description:

AFRL's Rocket Test Site at Edwards AFB has collections of artifacts and stories in and around its Heritage Room and the rest of the site. While the room is being renovated and displays updated, the content and information of the artifacts and displays are dated and lack impact. The goal of the proposed effort is to improve the accessibility, relevance, and technical information about the artifacts and pictures on display.
